

ZIYA FAZAL B

ziyafazal1@gmail.com | +91-7019952849 | Bangalore, India

PROFESSIONAL SUMMARY

Product Engineer experienced in building enterprise applications using Frappe, ERPNext, Python, and REST APIs. Skilled in workflow automation, financial system development, backend API design, and scalable search implementation using Amazon OpenSearch. Strong ability to translate business requirements into efficient technical solutions while ensuring reliability and performance in production systems.

EXPERIENCE

Product Engineer — Frugal Scientific Pvt Ltd, Bangalore

Sep 2025 – Present | Project: Integro – Loan Recovery & Financial Operations Platform

- Developed product features for Integro, a financial loan recovery platform managing recovery workflows.
- Customized Frappe/ERPNext DocTypes, workflows, and validations for loan lifecycle and compliance processes.
- Built backend REST APIs to manage loan records, recovery stages, and operational transactions.
- Integrated Amazon OpenSearch for high-speed frontend search, filtering, and data exploration.
- Implemented automation for recovery stage transitions and operational workflows.
- Designed custom reports and dashboards for monitoring recovery metrics and operational APIs.
- Collaborated with product managers, QA teams, and stakeholders to deliver scalable system enhancements.

Software Engineer — Data For Decisions, Bangalore

Feb 2024 – Sep 2025

- Developed a Procure-to-Pay (P2P) and Concurrent Audit system for Quess Corp.
- Customized ERPNext modules including Purchase Order, Material Request, and Purchase Receipt workflows.
- Built a Vendor Onboarding Portal integrated with ERPNext procurement processes.
- Developed secure REST APIs for Namaste Tax supporting mobile and web integrations.
- Created automation scripts and reports to improve financial process visibility and efficiency.

Full Stack Developer Intern — Dlithe Consultancy Services, Bangalore

Oct 2023 – Feb 2024

- Developed a Digital Asset Management System using the Frappe Framework.
- Built 'Go Rentals', a role-based rental management platform for customers, drivers, and administrators.
- Worked on backend APIs, database schema design, and UI enhancements.
- Gained practical experience with Git version control and CI/CD workflows.

EDUCATION

B.E. Computer Science — Bapuji Institute of Engineering and Technology, Davangere (2020 – 2023) | CGPA: 7.90

PROJECTS

P2P & Concurrent Audit System — Client: Quess Corp

- Customized and developed ERPNext modules, particularly around P2P workflows.
- Worked closely with functional teams to understand business requirements and translate them into technical solutions.
- Implemented automation scripts, custom reports, and workflow enhancements in ERPNext.
- Troubleshoot, maintained, and supported ongoing P2P process flows within the system.
- Ensured data integrity, system stability, and compliance with best practices.

Ifindex – Loan Recovery Application

- Automated data ingestion and transformation workflows using Apache Airflow.
- Integrated Amazon OpenSearch for scalable search and filtering across loan datasets.
- Built APIs to synchronize operational data and support reporting systems.
- Configured role-based permissions and multilingual support.

adrEdge – Online Dispute Resolution (ODR/ADR) Platform for Financial Services

- Contributing to adrEdge, a SaaS-based Online Dispute Resolution and Alternate Dispute Resolution platform built for banks, NBFCs, and HFCs to resolve commercial disputes and accelerate loan recovery cycles.
- Building the accounting module on Frappe ERPNext v16, including setup and configuration of the Chart of Accounts and core accounting settings.
- Customizing DocTypes and workflows to support financial record-keeping aligned with dispute resolution and recovery processes.
- Working within a legally compliant framework (Arbitration & Conciliation Act, 1996) supporting online arbitration, mediation, and conciliation workflows.

Sai Sparsh App — SSSIHMS (Sri Sathya Sai Institute of Higher Medical Sciences)

- Designed and developed a custom healthcare application for SSSIHMS using the Frappe Framework.
- Built role-based modules for patients, doctors, and administrators covering appointments, records, and care workflows.
- Implemented backend APIs and DocTypes to support end-to-end healthcare operations within the platform.

TECHNICAL SKILLS

Languages: Python, JavaScript, React

Frameworks: Frappe Framework, ERPNext, FastAPI

Databases: MariaDB, PostgreSQL, MySQL

Search & Analytics: Amazon OpenSearch

Cloud & DevOps: AWS, Jenkins, CI/CD

Tools: Git, GitHub, Apache Airflow

Operating Systems: Linux, Windows

CERTIFICATIONS

- AWS & DevOps Internship – CI/CD using Jenkins
- Python Developer Internship – Dlithe Consultancy Services
- Cisco Certified – Programming Essentials in Python

PUBLICATIONS

Blockchain Solution for Educational Sector

Co-authored a peer-reviewed research paper published in the International Journal of Innovative Research in Computer and Communication Engineering (IJIRCCE), exploring the use of decentralized ledger technology to secure academic records, prevent certificate forgery, and enable automated credential validation.
